

# Thermal Cycler

## COMPANY INTRODUCTION

For decades, we have specialized in thermal cyclers with proven performance and unmatched combination of features, just right for PCR procedures (Polymerase Chain Reaction) carried out in every laboratory, whether you run only a few samples per week or perform high-throughput processes.

Unicorn's conventional and real-time thermal cyclers are designed to meet critical requirements for various PCR applications. Hundreds and thousands of our product are in daily use around the globe, helping scientists, health professionals and laboratory managers achieve high level of accuracy and consistency in their work.

Its Peltier-based temperature heating and cooling technology guarantees precise control and extremely fast ramp rates compared with other suppliers. Unicorn thermal cyclers have different block configurations and equipped with additional functions like conventional gradient, dynamic gradient and 2-D gradient etc. The newest and compact industrial design ensures low footprint, suitable for small laboratories.

We believe in giving our customers a choice in how they use our thermal cyclers supported by excellent service and support. Our dedication to PCR is a guarantee that we will continue to provide better solutions with better services for many years to come.

# WATSON-D SERIES THERMAL CYCLER

## Dual block 2-dimensional gradient function

- **Innovative research and development**
- **Dual block 2-dimensional PCR**
- **Multiple gradient exploration function**

## Introduction :

WATSON-D/D+ series thermal cycler has Android operation system and 10.1 inch capacitive touch screen. Independent operation of double blocks. Air channel is in front and back and it allows machine placed side by side. Self-adapting pressure hot lid makes closing lid and tightening lid in one step. It has long service life peltier heating units and max. ramping rate is 8°C/S. Wifi module is built in and user can control many units of PCR through mobile App.

## Features:

- Long service life Peltier heating units.
- Reinforced aluminum module with anodizing technology can keep rapid heating-conducting property and have enough corrosion resistance.
- High heating and cooling rate, max. Ramping rate 8°C/s, can save your precious time.
- Double blocks design, 64 well block on the left can set two-dimensional gradient, 32 well module on the right can set conventional gradient.
- Self-adapting pressure hot lid makes closing lid and tightening lid in one step.
- Air channel is in front and back and it allows machine placed side by side.
- It has Android operation system and 10.1 inch capacitive touch screen. It has graphical menu navigation interface and operation is very simple.
- Built-in 11 standard program file template, can quickly edit the required files.
- The running program and left time can be displayed in real time , allow to edit file when program is running.
- One-click quick incubation function can meet experiment's needs such as denaturation, enzyme cutting/enzyme-link and ELISA.
- Hot lid temperature and hot lid work mode can be set to meet different experiment's need.
- Automatic restart after power failure. When power is restored it can continue to run unfinished program.
- Support USB to store and copy PCR data, user can control PCR by USB mouse.
- Update software by USB and LAN.
- WIFI module built-in, one unit can control multiple PCR machine through computer or cell phone with internet connection.
- Email notification after experiment is over.

# WATSON SERIES THERMAL CYCLER

## Introduction

WATSON series thermal cycler has Android operation system and 10.1 inch touch screen. Operation is very smooth and simple. Air channel is in front and back and it allows machine placed side by side. Self-adapting pressure hot lid makes closing lid and tightening lid in one step. It has long service life peltier heating units and max. ramping rate is 8 C/S and cycle times is more than 1000,000. Wifi module is built in and user can control many units of PCR through mobile App.

## Features

- Long service life Peltier heating units.
- Reinforced aluminum module with anodizing technology can keep rapid heating-conducting property and have enough corrosion resistance.
- High heating and cooling rate, max. Ramping rate 8 C/s, can save your precious time.
- Self-adapting pressure hot lid makes closing lid and tightening lid in one step.
- Air channel is in front and back and it allows machine placed side by side.
- It has Android operation system and 10.1 inch capacitive touch screen. It has graphical menu navigation interface and operation is very simple.
- Built-in 11 standard program file template, can quickly edit the required files.
- The running program and left time can be displayed in real time , allow to edit file when program is running.
- One-click quick incubation function can meet experiment's needs such as denaturation, enzyme cutting/enzyme-link and ELISA.
- Hot lid temperature and hot lid work mode can be set to meet different experiment's need.
- Automatic restart after power failure. When power is restored it can continue to run unfinished program.
- Support USB to store and copy PCR data, user can control PCR by USB mouse.
- Update software by USB and LAN.
- WIFI module built-in, one unit can control multiple PCR machine through computer or cell phone with internet connection.
- Email notification after experiment is over.

# HELIX EXPLORER SERIES THERMAL CYCLER

- Powerful features
- Various blocks can be chosen
- Android system for easy operation

## Introduction

HELIX EXPLORER series thermal cycler uses customized Marlow(US) peltier. Its maximum ramping rate is 5 °C/s and cycle times is more than 1000,000. The product combines a variety of advanced technologies: Android operating system, colored touch screen, run dual block independently, Built-in WIFI module, mobile APP and PC software control function, big storage capacity and email alert function. All above functions allow PCR's excellent performance and meet higher experiment's need.

## Features

- 8 pcs long service life Peltier heating units and form 4 circuits to control 4 temperature zones and allow double block gradient function;
- Reinforced aluminum module with anodizing technology can keep rapid heating-conducting property and have enough corrosion resistance;
- High heating and cooling rate, max. Ramping rate 5 °C/s, can save your precious time;
- Two blocks independently controlled and can run 2 different PCR programs simultaneously;
- Stepless adjustable hot lid with pressure-protection, fit tubes of different heights to avoid tube melt and evaporation;
- Android operating system, capacitive touch screen, high-definition TFT display (8", 800×600 pixels, 16 colors) with graphical interface provides easy use for setting up and monitoring.
- Built-in 11 standard program file template, can quickly edit the required files;
- The running program and left time can be displayed in real time , allow to edit file when program is running;
- One-click quick incubation function can meet experiment's needs such as denaturation, enzyme cutting/enzyme-link and ELISA;
- Internal flash memory for 10000 typical PCR files in free configurable folders;
- Hot lid temperature and hot lid work mode can be set to meet different experiment's need;
- Automatic restart after power failure. When power is restored it can continue to run unfinished program;
- GLP report records every step to provide accurate data support for experiment result analysis;
- User Login Management, three-tier permission, password protection function to ensure data security;
- Support U disk to get PCR data, to update software, and USB mouse can also be used to control the PCR instrument;
- Built-in WIFI module, one machine can control multiple PCR machines at the same time through mobile APP or PC software;
- Support email-alert function when experiment is over.

# HELIX-S SERIES THERMAL CYCLER

Gradient Function

- Intelligent thermal cycler
- Fast ramp rate to save time
- Built-in WIFI module

## Introduction

HELIX-S series thermal cycler uses long service life peltier. Its max. ramping rate is 4.5 °C/s and cycle times is more than 1000,000. The product combines a variety of advanced technologies: Android system; Color capacitive touch screen; several block as options; built-in WIFI module, mobile APP and PC software control function; email notification function; big storage capacity and etc. All above functions allow PCR's excellent performance and meet higher experiment's need.

## Features

- Six pieces of long service life Peltier heating units and form 3 circuits to control 3 temperature zones;
- Reinforced aluminum module with anodizing technology can keep rapid heating-conducting property and have enough corrosion resistance.
- High heating and cooling rate, max. Ramping rate 4.5 °C/s, can save your precious time.
- Stepless adjustable hot lid, fit tubes of different heights to avoid tube melt and evaporation.
- Android operating system, capacitive touch screen, high-definition TFT display (8", 800×600 pixels, 16 colors) with graphical interface provides easy use for setting up and monitoring.
- Built-in 11 standard program file template, can quickly edit the required files.
- Folder management, user can build directory.
- The running program and left time can be displayed in real time, allow to edit file when program is running.
- Internal flash memory for 10000 typical PCR files in free configurable folders.
- Hot lid temperature and hot lid work mode can be set to meet different experiment's need.
- Automatic restart after power failure. When power is restored it can continue to run unfinished program.
- GLP report records every step to provide accurate data support for experiment result analysis.
- User Login Management, three-tier permission, password protection function to ensure data security.
- Support U disk to get PCR data, to update software, and USB mouse can also be used to control the PCR instrument;
- Built-in WIFI module, one machine can control multiple PCR machines at the same time through mobile APP or PC software;
- Support email-alert function when experiment is over.

# HELIX-3 / HELIX-3G SERIES THERMAL CYCLER

Triple Block Gradient

- **Intelligent and innovative design**
- **Triple block gradient PCR**
- **Fast ramp rate saving your time**

## Introduction

HELIX-3/HELIX-3G thermal cycler uses long service life peltier. Its max. Ramping rate is 5 °C/s and cycle times is more than 1000,000. The product combines a variety of advanced technologies: Android system; Color capacitive touch screen; 3 blocks can run gradient experiments independently; built-in WIFI module, mobile APP and PC software control function; email notification function; big storage capacity and etc. All above functions allow PCR's excellent performance and meet higher experiment's need.

## Features

- 6 long service life Peltier heating units and form 3 circuits to control 3 temperature zones.
- Reinforced aluminum module with anodizing technology can keep rapid heating-conducting property and have enough corrosion resistance.
- High heating and cooling rate, max. Ramping rate 5 °C/s, can save your precious time;
- 3 blocks independently controlled and can run 3 different PCR gradient programs simultaneously.
- Stepless adjustable hot lid with pressure-protection, fit tubes of different heights to avoid tube melt and evaporation.
- Android operating system, capacitive touch screen, high-definition TFT display (8", 800×600 pixels, 16 colors) with graphical interface provides easy use for setting up and monitoring.
- Built-in 11 standard program file template, can quickly edit the required files.
- Folder management, user can build directory.
- One-click quick incubation function can meet experiment's needs such as denaturation, enzyme cutting/enzyme-link and ELISA.
- Internal flash memory for 10000 typical PCR files in free configurable folders.
- Hot lid temperature and hot lid work mode can be set to meet different experiment's need.
- Automatic restart after power failure. When power is restored it can continue to run unfinished program.
- GLP report records every step to provide accurate data support for experiment result analysis.
- User Login Management, three-tier permission, password protection function to ensure data security.
- Support U disk to get PCR data, to update software, and USB mouse can also be used to control the PCR instrument;
- Built-in WIFI module, one machine can control multiple PCR machines at the same time through mobile APP or PC software;
- Support email-alert function when experiment is over.

# HELIX-4T IN-SITU SERIES THERMAL CYCLER

IN SITU Block

- Customization of different chip specifications
- Used for in situ hybridization or gene chip assay
- Colored touch screen, easy for operation

## Introduction

HELIX-4T IN-SITU thermal cycler uses long service life peltier. Its max. ramping rate is 4 °C/s and cycle times is more than 1000,000. The product combines a variety of advanced technologies: Android system; Color capacitive touch screen; several block as options; built-in WIFI module, mobile APP and PC software control function; email notification function; big storage capacity and etc. All above functions allow PCR's excellent performance and meet higher experiment's need.

## Features

- Six pieces of long service life Peltier heating units and form 3 circuits to control 3 temperature zones;
- Reinforced aluminum module with anodizing technology can keep rapid heating-conducting property and have enough corrosion resistance.
- High heating and cooling rate, max. Ramping rate 4 °C/s, can save your precious time.
- Stepless adjustable hot lid, fit tubes of different heights to avoid tube melt and evaporation.
- Android operating system, capacitive touch screen, high-definition TFT display (8", 800×600 pixels, 16 colors) with graphical interface provides easy use for setting up and monitoring.
- Built-in 11 standard program file template, can quickly edit the required files.
- Folder management, user can build directory.
- Running program and left time can be displayed in real time, allow to edit file when program is running.
- One-click quick incubation function can meet experiment's needs such as denaturation, enzyme cutting/enzyme-link and ELISA.
- Internal flash memory for 10000 typical PCR files in free configurable folders.
- Hot lid temperature and hot lid work mode can be set to meet different experiment's need.
- Automatic restart after power failure. When power is restored it can continue to run unfinished program.
- GLP report records every step to provide accurate data support for experiment result analysis.
- User Login Management, three-tier permission, password protection function to ensure data security.
- Support U disk to get PCR data, to update software, and USB mouse can also be used to control the PCR instrument;
- Built-in WIFI module, one machine can control multiple PCR machines at the same time through mobile APP or PC software;
- Support email-alert function when experiment is over.

Weight	9KG
Power Supply	100-240VAC, 50/60Hz,600w

# HELIX-96PLUS SERIES THERMAL CYCLER

Gradient Optimization

- **Six independent temperature zones**
- **Optimization of gradient function**
- **Colored touch screen, easy for operation**

## Introduction

HELIX-96PLUS thermal cycler uses customized Marlow(US) peltier. Its max. Ramping rate is 6 °C/s and cycle times is more than 1,000,000. The product combines a variety of advanced technologies: WINCE system; color touch screen; 6 independently controlled temperature zones; PC on-line function; printing function; big storage capacity and support USB device. All above functions allow PCR's excellent performance and meet higher experiment's need.

## Features

- Six pieces of long service life Peltier heating units and can independently control 6 temperature zones;
- Reinforced aluminum module with anodizing technology can keep rapid heating-conducting property and have enough corrosion resistance.
- High heating and cooling rate, max. Ramping rate 6 °C/s, can save your precious time;
- Stepless adjustable hot lid, fit tubes of different heights to avoid tube melt and evaporation.
- Windows interface, 8" ( 800×600, 16 colors) TFT color touch-screen with graphical display provides easy use for setting up and monitoring.
- Built-in 11 standard program file template, can quickly edit the required files.
- Folder management, user can build directory.
- The running program and left time can be displayed in real time, allow to edit file when program is running.
- One-click quick incubation function can meet experiment's needs such as denaturation, enzyme cutting/enzyme-link and ELISA.
- Internal flash memory for 10000 typical PCR files in free configurable folders.
- Hot lid temperature and hot lid work mode can be set to meet different experiment's need.
- Automatic restart after power failure. When power is restored it can continue to run unfinished program.
- GLP report records every step to provide accurate data support for experiment result analysis.
- User Login Management, three-tier permission, password protection function to ensure data security.
- Compatible with devices such as Mouse and Keyboard and capable to transfer data and perform software updates via USB Drive.
- Support USB and LAN to update software.
- One computer can control many sets of PCR via network connection.
- Min type Bluetooth printer as an option, easily record information. Support email-alert function when experiment is over.

# TECHNICAL SPECIFICATIONS

Model No.	HELIX-96PLUS
Capacity	96×0.2ml (6 independent 16 well block)
Temperature Range	4-100℃
Max. Ramp Rate	6℃/s
Uniformity	≤±0.3℃
Accuracy	≤±0.1℃
Display Resolution	0.1℃
Temp. Control	Block/Tube
Ramp Rate Adjustable	0.1-6℃/s
Gradient Temp. Range	30-100℃/s
Gradient Spread	Temperature difference of adjacent temperature zone is 0.1-5℃. 6 temperature zones in total.
Hot Lid Height Adjustable	Stepless Adjustable
Hot Lid Temperature	30-115℃
Number of Programs	10000+(USB FLASH)
Max. No. of Step	30
Max. No. of Cycle	100
Time Incre./Decre.	1 Sec - 600 Sec
Temp. Incre./Decre.	0.1-10.0℃
Pause Function	Yes
Auto Data Protection	Yes
Hold at 4℃	Forever
Touchdown Function	Yes
Long PCR Function	Yes
Language	English
Computer Software	Yes
Mobile Phone App	Yes
LCD	8 inch, 800×600 pels
Communication	USB2.0, LAN
Dimensions	390mm×270mm×255mm (L×W×H)
Weight	9KG
Power Supply	85-264VAC, 47-63Hz,600W

# LARK SERIES THERMAL CYCLER

Gradient function

LARK-16

LARK-32G

- **Compact design with small footprint**
- **Android system for intuitive operation**
- **WIFI module built-in, cell phone App control**

## Introduction

LARK series thermal cycler uses long service life peltier. Its max. Ramping rate is 5 °C/s and cycle times is more than 1000,000. The product combines a variety of advanced technologies: Android system; color touch screen; gradient function; WIFI module built-in; support cell phone APP control; email notification function; big storage capacity and support USB device.

## Features

- Long service life Peltier heating units.
- Reinforced aluminum module with anodizing technology can keep rapid heating-conducting property and have enough corrosion resistance.
- High heating and cooling rate, max. Ramping rate 5 °C/s, can save your precious time.
- Scalable hot lid fits tubes of different heights.
- TFT color capacitive touch screen ( 5 inches, 800×480 pels), graphical menu navigation interface, very easy to operate.
- Built-in 11 standard program file template, can quickly edit the required files.
- Folder management, user can build directory.
- The running program and left time can be displayed in real time , allow to edit file when program is running.
- One-click quick incubation function can meet experiment's needs such as denaturation, enzyme cutting/enzyme-link and ELISA.
- Hot lid temperature and hot lid work mode can be set to meet different experiment's need.
- Automatic restart after power failure. When power is restored it can continue to run unfinished program.
- Support USB to store and copy PCR data, user can control PCR by USB mouse.
- Update software by USB and LAN.
- WiFi module built-in, one unit can control multiple PCR machine through computer or cell phone with internet connection.
- Support email-alert function when experiment is over.

# TECHNICAL SPECIFICATIONS

Model No.	LARK-16	LARK-32G
Capacity	16×0.2ml(4×4 layout)	32×0.2ml(4×8 layout)
Tube	0.2ml tube	0.2ml tube, 8 strips
Reacton Volume	5-80µl	
Temperature Range	4-100℃	
Max. Ramp Rate	5℃/s	
Uniformity	≤ ±0.2℃	
Accuracy	≤ ±0.2℃	
Display Resolution	0.1℃	
Temp. Control	Block/Tube	
Ramp Rate Adjustable	0.1-5℃/s	
Gradient Temp. Range	n/a	30-100℃
Gradient Type	n/a	Normal Gradient
Gradient Speed	n/a	1-30℃
Hot Lid Temperature	30-115℃	
Number of Programs	10000+(USB FLASH)	
Max. No. of Step	30	
Max. No. of Cycle	100	
Time Incre./Decre.	1 Sec - 600 Sec	
Temp. Incre./Decre.	0.1-10.0℃	
Pause Function	Yes	
Auto Data Protection	Yes	
Hold at 4℃	Forever	
Touchdown Function	Yes	
Long PCR Function	Yes	
Language	English	
Computer Software	Yes	
Mobile Phone App	Yes	
LCD	5 inch, 800×480 pels, 65K color	
Communication	USB2.0, WIFI	
Dimensions	267mm×190mm×115mm (L×W×H)	
Weight	2.5KG	2.6KG
Power Supply	100-240VAC, 50/60Hz,120W	100-240VAC, 50/60Hz,200W
